# About XLENT

## Shaping the Future of IT Consulting.

XLENT is a leading Nordic IT consultancy dedicated to delivering sustainable and innovative digital solutions. They partner with businesses to provide real value and a competitive edge by closely aligning technology with business needs. They have a strong focus on quality, and cybersecurity is at the heart of everything they do. Privately owned with over 550 employees across Norway and Sweden—including offices in Oslo, Ålesund, Trondheim, and fifteen locations in Sweden—XLENT is committed to long-term collaborations and consistently delivering more than expected.

# XLENT's Experience with CanIPhish

At XLENT Cyber Security, we utilize the CanIPhish platform to deliver effective phishing simulations that enhance our clients' security awareness and resilience against cyber threats. The platform is both customizable and reliable, allowing us to tailor each simulation to meet specific client needs. Additionally, the support from the CanIPhish team has been exceptional, consistently providing outstanding support and enabling us to improve our service to our clients continuously.

— **Camille Victor Prunier**  
COO, Partner & Penetration Tester

# What challenges were you facing before CanIPhish?

Before adopting CanIPhish, we faced the challenge of delivering high-quality phishing simulations without investing significant time and resources into setting up and developing our own infrastructure. We needed a customizable platform that could provide effective simulations without the overhead of building and maintaining it ourselves.

“

We like the platform's flexibility, which allows us to customize every aspect of the phishing simulations.

”

# Why did you choose CanIPhish over other options?

We chose CanIPhish because many other phishing solutions had hidden pricing structures that required sales meetings to uncover. CanIPhish stood out by offering clear and transparent pricing directly on their website, which immediately caught our attention. After the team provided an excellent demonstration of the tool, we recognized that CanIPhish had the capabilities we needed and would be a perfect phishing simulation tool for our clients.

# How has CanIPhish impacted your organization?

CanIPhish has positively impacted our organization by enabling us to create highly customized phishing simulations tailored to each client's specific needs. The platform allows us to track and report the effectiveness of our security awareness initiatives within each organization we work with.

“

The CanIPhish team has been exceptional, consistently providing outstanding support, enabling us to continuously improve our service to our clients.

”

# Since coming on board, what do you like best about CanIPhish?

What we appreciate most about CanIPhish is the platform's flexibility. It allows us to customize every aspect of the phishing simulations. This level of control helps us deliver highly tailored and effective simulations that resonate with each client's unique environment.

# Would you recommend CanIPhish to others?

Yes, 100%. If you're looking for a phishing simulation platform that offers transparent pricing, exceptional customization options, and outstanding support, then CanIPhish is the perfect choice.
